WiBorne offers UHF RFID systems for seeing the widest use in supply-chain and retail applications. The 900MHz EPC UHF RFID is the best available frequency for distances of meters, effective around metals with range up to 10 meters. It is good with non-Line-of-Sight (NLoS) communication, high identification rate, reasonably controlled read zone through antenna directionality.

Applications includes Logistics (identification of trolleys, parcels, animals, boxes etc), road tolls, automated vehicle identification (AVI), sport timing, access control / ticketing, tracking goods in the global supply chain, pharmaceuticals, tracking of airline baggage, document, express parcel, library applications, and life sciences goods.

WiBorne Indoor / Outdoor Readers
UHF-1000 Reader is designed as a sophisticated RFID Readers Platform for both indoor and outdoor. These are built with premium RF performance and operating stability 4 reading points, Ethernet remote configuration, C++/Java API supporting makes UHF-1000 the most suitable for harsh, noisy, challenging surroundings. Our RFID readers can scan hundreds of UHF tags simultaneously.

EPC Gen2 and ISO 18000 Ready
Evolving from UHF-1000 over 5 meters ISO reading, UHF-1000 is fully compliant with EPC Gen2 and ISO 18000 standards, with best reading performance on the market.

Intelligent Reading Environment
Weather proofed 8 antennas, multi-readers, intelligent reader, smart edge architecture or functions. We provide the most competitive cost. Work with WiBorne to enjoy your ideal RFID systems with best ROI. Leveraging Asia's world famous hardware support, along with logistic business models from the States, WiBorne adopts progressive steps to enable intelligent RFID environment:
- RFID Intelligent Integrated API: to verify or conduct trials with flexibility and cost efficiency. WiBorne RFID API can be applied to a WinCE based industrial computer with ALE ready.
- Intelligent RFID Modules (RU-900), a combination of UHF-1000 and API. RU-900 is flexible to adapt variety of frequency to achieve high RFID protocol performance requirement.

UHF Band EPC Gen 2 and ISO 18000 Reader: UHF-1000

Product Feature
- ISO 18000 6B Fixed Reader or US UHF Band EPC G2 Fixed Reader
- 4 reading points, Ethernet remote configuration. Power adjustment, .Net/Java API supported makes this reader the most suitable for harsh, noisy, challenging surroundings.
- IP-55 Protection suits for most application environment, especially for outdoor usage.
- PoE Power over Ethernet design makes it easy for installation.
- Thorough API support for various development environment
- High reliability – Telecommunication design philosophy
- Extreme ingenious platform for customization or lean adoption
- Low Cost/Feature ratio, lowering the barrier to deploy RFID System
- Certified by EPCglobal with great reading performance

Intelligent API for Integration

WiBorne Intelligent API offers communication between WiBorne RFID Reader (UHF-1000) and Data Server such as Microsoft BizTalk. This integrate RFID systems to automate processes and communicate across global processes, partnerships, and supply chains. With any embedded system comprises hardware platform, Digital I/O, embedded operating system platform, application software, designed to manage RFID networks and handle the resulting streams of data before they are passed on to data server. WiBorne Intelligent API filters redundant data and only passes information along that is requested or constitutes a change of situation.

**Solution Feature**

- Configure your RFID network to handle different business scenarios that are specific to an item, a pallet, and other criteria.
- Manage the historical data and provide the flexibility to draw on the relevant data at any given point of time.
- Handle exceptional conditions such as wrong shipments, wrong locations, missing items, damaged items or discrepancies between documents and generate actionable alerts and notifications.
